Description of necessary measures according to routes of exposure

Swallowed	Do NOT induce vomiting. Rinse mouth with water and give water to drink provided victim is conscious. Seek urgent medical attention.
Eye	Hold eyelids apart and flush with running water for at least 15 minutes. Seek medical attention.
Skin	Remove contaminated clothing. Flush skin with running water. If pain or redness persists, see a doctor.
Inhaled	Remove from exposure to fresh air. Seek medical attention.
Advice to Doctor	Treat symptomatically based on individual reactions of patient and judgment of doctor. Treat symptomatically for an alkaline powder.
Additional Information	Aggravated medical conditions caused by exposure Prolonged exposure can lead to drying of skin and may lead to dermatitis.

5. FIRST AID MEASURES

Extinguishing Media	In case of fire, use appropriate extinguishing media most suitable for surrounding fire conditions.
Hazards from Combustion Products	Non combustible. If in a fire may decompose on heating and produce fumes of phosphorous oxides, oxygen and carbon dioxide.
Special protective precautions and equipment for fire fighters	Fire fighters should wear a self contained breathing apparatus and full protective clothing along with protective equipment.
Flammability Conditions	Product is non-flammable.
Additional Information	Hazchem Code : N/A

6. ACCIDENTAL RELEASE MEASURES

Emergency procedures	Personnel involved in the clean up should wear full protective clothing. Eliminate all sources of ignition. Increase ventilation. Avoid generating dust. Do not allow product to reach drains, sewers or waterways. If the product does enter a waterway, advise the Environmental Protection Authority or your local Waste Management Authority.
Methods and materials for containment and clean up	Contain and sweep/shovel up spills with dust binding material or use an industrial vacuum cleaner. Transfer to a suitable, labeled container and hold for disposal. Minor amounts can be washed away with plenty of water.

7. HANDLING AND STORAGE

Precautions for safe handling	Ensure an eye bath and safety shower are available and ready for use. Handle in accordance with good industrial hygiene and safety practice. Wash thoroughly after handling.
Conditions for safe storage, including any incompatibles	Store in a cool, dry, well-ventilated area. Keep containers tightly sealed when not in use. Inspect regularly for deficiencies such as damage or leaks. Protect from physical damage. Store away from incompatible materials. Not defined as Dangerous Goods by the Australian Dangerous Goods Code.
Container Type	No information available on container types for this product.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

National Exposure Standards	No exposure standard has been established for this product by the Australian National Occupational Health and Safety Commission (NOHSC). However, the exposure standard for dust not otherwise specified is 10mg/m ³ (for inspirable dust) and 3mg/m ³ (for respirable dust).
Biological Limit Values	No information available on biological limits for this product.
Engineering Controls	A system of local and/or general exhaust is recommended to keep employee exposures as low as possible. Local exhaust ventilation is generally preferred because it can control the emissions of the contaminant at its source, preventing dispersion of it into the general work area.
Personal Protection	RESPIRATOR: Where engineering controls are inadequate, wear an NIOSH approved respirator. EYES: Use safety glasses. HANDS: Rubber gloves. CLOTHING: Standard work uniform/clothing.
