Global Green

Global Green is dedicated to providing safe and sustainable cleaning solutions since 1995. Our products are ideal for oil/water pits and separators, are biodegradable, and support a local business and jobs. Made in Australia, Global Green is committed to reducing environmental impact.

**Quick Break**
- Ideal for oil/water pits and separators

**Organic 202**
- Made in Australia
- Support a local business and jobs
- Biodegradable
- Not harmful to the environment

**Workshop**
- Safe and sustainable cleaning since 1995

**Super Concentrate**
- Made in Australia
- Support a local business and jobs
- Biodegradable
- Not harmful to the environment

**Truck Wash**
- Safe and sustainable cleaning since 1995

**Grease Cutter**
- Made in Australia
- Support a local business and jobs
- Biodegradable
- Not harmful to the environment

THE BASICS

The Global Green story

The Global Green range of industrial degreasers and cleaning products has been made in Australia for Australian conditions since 1995. Developed by industry experts, each Global Green product has been specifically designed to deliver outstanding degreasing and cleaning performance across all industries and applications.

As a locally-made product, Global Green’s cost-effective price point remains unaffected by currency fluctuations. Coupled with an uninterrupted supply and delivery program, you can be assured Global Green will meet your time, cost and quality expectations every time.

All Global Green degreasers and cleaners are powerful products which safely penetrate and lift oils, grease and fats and can easily replace hazardous cleaners from your workplace. They are non-flammable, and non-toxic, as well as phosphate-free, which helps prevent the build-up of blue green algae in waste water.

The Global Green range includes the following industrial degreasers and cleaners in a variety of sizes:

- Workshop - our flagship product ideal for a wide range of applications and industries
- Truck wash - designed for vehicles washdown, features a pleasant lemon scent
- Organic 202 - our certified organic degreaser ideal for food processing and hospitality industries
- Super concentrate - 5x stronger than Workshop - suitable for decanting and diluting as required
- Grease cutter - extra heavy duty, alkaline industrial degreaser for engines, oil/grease encrusted equipment or heavily soiled floors.

The importance of ‘quick-break’

With the exception of our Organic 202 range, all Global Green products are fast and efficient quick-break degreasers.

Quick-break degreasers clean dirt and grime, and remove oil by emulsification (breaking the oil down into ever-decreasing droplet sizes). As the quick-break degreaser is washed away, the ‘breaking’ action releases 92% of the oil within 10 minutes, allowing the oil to rise to the surface of the collection pit or separator for recovery.

QUICK BREAK IN ACTION

Global Green workshop is a concentrate and can be diluted up to 100:1 depending on your application.

**WORKSHOP**

Global Green workshop is our flagship non-phosphorous, environmentally-friendly, heavy duty industrial degreaser and cleaner. It is designed to remove a wide range of soils, oil, grease, dust and carbon without causing damage. It can be diluted for use with foamers, dispensers and pressure cleaners.

Global Green workshop has a wide range of applications and can be used to clean the following:

- Mining and earthmoving machinery
- Agricultural and industrial machinery
- Engines, gearboxes and chassis
- Trucks, cars and buses
- Workshop floors and driveways
- Parts washing and bath degreasing
- Pressure washing
- Boats, engines and bilges
- Washroom and canteen floors
- Kitchen appliances

**Dilution guide**

Dilute with water at the following rates:

**MADE IN AUSTRALIA**

Support a local business and jobs

**BIODEGRADABLE**

Not harmful to the environment

Global Green workshop is safe to use on all metals - will not affect good paint. It may be used with a low-volume foamer or venturi systems. Brush, swab or spray onto surface to be cleaned, allow to soak into heavily soiled areas then wash off with water. May be used at a 1:1 dilution for vehicles with heavy oil coverage.
Global Green truck wash is a non-phosphorous, environmentally-friendly, heavy duty industrial degreaser and cleaner designed to remove a wide range of soils, oil, grease, dust and carbon from vehicles and mobile machinery without causing damage. This lemon-scented cleaner can be diluted for use with foamers, dispensers and pressure cleaners.

Ideal applications for truck wash include:
- Mining and earthmoving machinery
- Agricultural and industrial machinery
- Engines, gearboxes and chassis
- Trucks, cars and buses
- Pressure washing
- Parts washing and bath degreasing

Truck wash can also be used for cleaning boats, engines and bilges, workshop floors and driveways, washroom and canteen floors, and kitchen appliances.

- Safe to use on all metals - will not affect good paint
- May be used with a low-volume foamer or venturi systems
- Brush, swab or spray onto surface to be cleaned
- Allow to soak into heavily soiled areas then wash off with water
- May be used at a 1:1 dilution for vehicles with heavy oil coverage

Global Green truckwash is a heavy duty cleaning agent that removes dirt, dust, oil, grease, fuel etc. It is not abrasive or corrosive and is safe to handle with no fumes or risk of explosion. Truck wash is environmentally-friendly with quick-break properties which make it ideal for oil/water pits and separators.
Organic 202

Global Green organic 202 is our organic, non-phosphorous, environmentally-friendly, heavy duty industrial degreaser and cleaner.

Certified by NASAA as an input for organic production (certification number: 3502M), organic 202 is suitable for use in sensitive areas such as food production and processing, hospitality, healthcare, forestry or marine environments. It contains no hydrocarbons, hazardous or toxic ingredients, or harsh chemicals.

Organic 202 is designed to remove a wide range of soils, oil, grease, dust and carbon without causing damage. It can be diluted for use with foamers, dispensers and pressure cleaners.

Organic 202 is ideal for use with:
- Food manufacturing equipment
- Kitchen appliances
- Washroom and canteen floors
- Ships, boats, engines and bilges
- Commercial floor scrubbers
- Agricultural and industrial machinery
- Pressure washing
- Mining and earthmoving machinery
- Engines, gearboxes and chassis
- Trucks, cars and buses
- Workshop floors and driveways

Organic 202:
- Is safe to use on all metals - will not affect good paint
- May be used with a low-volume foamer or venturi systems
- Brush, swab or spray onto surface to be cleaned, then allow to soak into heavily soiled areas and wash off with water
- May be used at a 1:1 dilution for equipment with heavy oil coverage

SUPER CONCENTRATE

Global Green super concentrate is five times stronger than our flagship Global Green workshop and is ideal for users in remote locations. It is a non-phosphorous, environmentally-friendly, heavy duty industrial degreaser and cleaner, designed to remove a wide range of soils, oil, grease, dust and carbon without causing damage.

Initially dilute the super concentrate for a workable solution. It can be further diluted for use with foamers, dispensers and pressure cleaners.

Global Green super concentrate has a wide range of applications and can be used to clean the following:

- Mining and earthmoving machinery
- Agricultural and industrial machinery
- Engines, gearboxes and chassis
- Trucks, cars and buses
- Workshop floors and driveways
- Parts washing and bath degreasing
- Pressure washing
- Boats, engines and bilges
- Washroom and canteen floors
- Kitchen appliances

**Dilution guide**

Initial dilution: Mix 20L of Global Green Super Concentrate with 80L of water to make 100L of workable solution.

After initial dilution, dilute with water at the following rates:

<table>
<thead>
<tr>
<th>Application</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mining equipment (heavily soiled)</td>
<td>4:1</td>
</tr>
<tr>
<td>Degreasing of engines and chassis</td>
<td>10:1</td>
</tr>
<tr>
<td>Concrete and workshop floors</td>
<td>10:1</td>
</tr>
<tr>
<td>Truck and car wash</td>
<td>50:1</td>
</tr>
<tr>
<td>Pressure washing</td>
<td>100:1</td>
</tr>
</tbody>
</table>

**Ordering codes**

Available in the following sizes:

- 500mL GGDC05-SC
- 5 litres GGDC5-SC
- 20 litres GGDC20-SC
- 200 litres GGDC200-SC
- 1000 litre IBC GGDC1000-SC

**After initial dilution:**

- Safe to use on all metals - will not affect good paint
- May be used with a low-volume foamer or venturi systems
- Brush, swab or spray onto surface to be cleaned
- Allow to soak into heavily soiled areas then wash off with water

Global Green super concentrate can be easily diluted on site making it ideal for users at remote locations.

GLOBAL GREASE CUTTER

Global grease cutter is an extra heavy duty, alkaline industrial degreaser developed for engines, oil and grease-encrusted equipment or heavily soiled workshop floors. It is non-flammable and contains no phosphorous.

Global grease cutter is highly viscous, clinging to vertical surfaces. It is effective with both hard and soft water.

Ideal applications for grease cutter include:
- Agricultural and industrial machinery
- Engines, gearboxes and chassis
- Concrete and workshop floors
- Parts washing and bath degreasing
- Mining and earthmoving machinery (do not use on windscreens or glass surfaces)

How to use Global grease cutter:
- Use undiluted to remove the heavy build up of grease and oil. Global grease cutter may be diluted for less heavily soiled surfaces up to a concentration of 5-10%
- Spray onto surface to be cleaned - allow 5-15 minutes for penetration of the soils and then wash off with a high pressure rinse
- Degreasing applications include exterior and interior (motors) of locomotives, heavy vehicles and earth-moving equipment. Global grease cutter will remove a wide variety of soils, oil, grease and fuel.
